

Quadrilateral Robot Project- Celene Han

Hi, My name is Bunnie™. I am a bunny robot and my purpose is to generate carrots for those facing food insecurity. On my free time I love to watch cartoons and feed my extra carrots to "real" bunny rabbits. I also love to learn about math, I especially love quadrilaterals. My inventor loved them so much she created me solely on quadrilaterals AKA a four-sided figure. I like to think my personality is sweet and smart! My favorite foods are carrot cake... carrot salad... roasted carrots... and you guessed it...

PIZZA! lol!

Bye for now, ♡
