

Student:

Assignment Sheet 06 - Create a Detailed Finishing Plan

Objective: To help students grasp the intricate process of generating a set of interior Construction documents. It will help them to understand the importance of noting all finishing products and the process of how those products are applied. In this scenario, students are to create a Finishing Plan as part of a more extensive set of Construction Documents.

Students are to create a typical Finishing Plan. This plan includes both materials and the finishing treatment being applied. Create a different shape for each type of specified material (i.e., Triangles  P-1 for Walls, Window Trimming, Doors, and Door Frame... Rectangles  STN-2 for Floor Coverings and Thresholds.... Hexagon  CT-1 for Countertops... ECT.). Make sure to apply each symbol to every surface. **Do not** assume that the Contractor or the Sub-Contractor knows what you are thinking...

Do not forget to note Door and Window with a Circle  1 Number for Doors and  A Letters for Window on the Base Floor Plan.

- ____/9. Make sure you draw in all **Flooring Detail Lines**, preferably in **Grey Scale**.
- ____/9. Be sure to include all **Ceiling Lines**, preferably in **Grey Scale**. It should be distinguishable from Floor Lines.
