

# Assignment 6: Balance and Aesthetics

Martha-Bryan Carr

DES 282

3/23/23

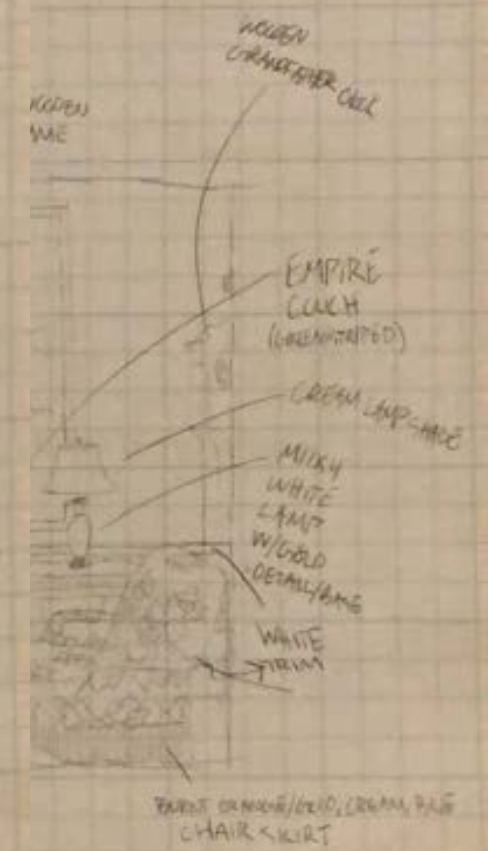

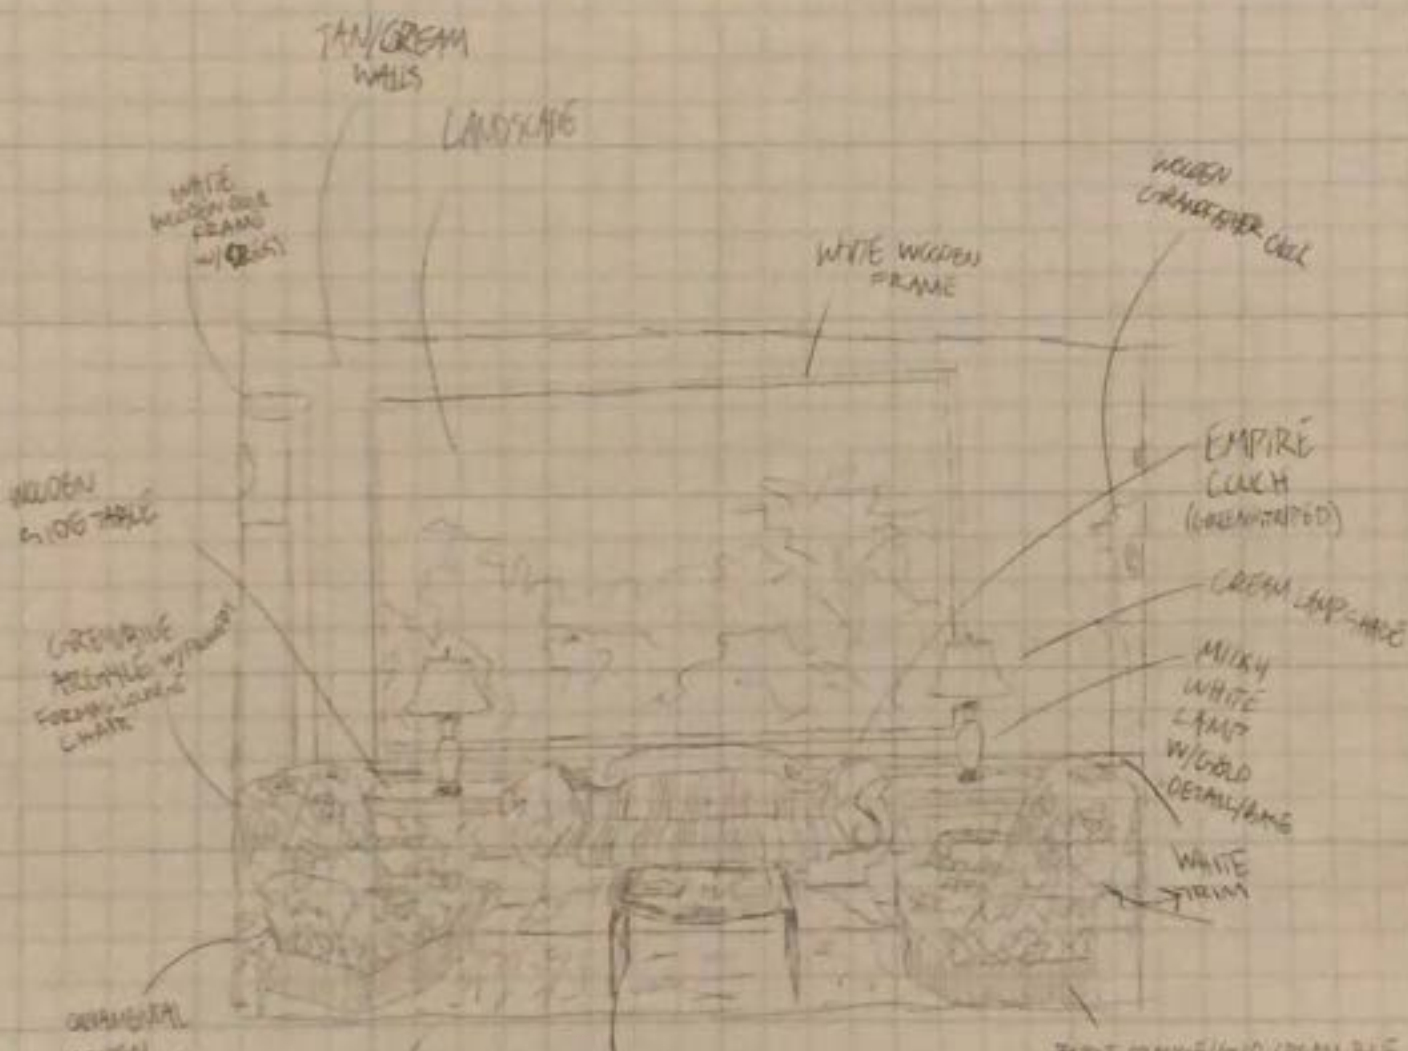

1. What activities take place within the space?  
Sleep and relaxation.

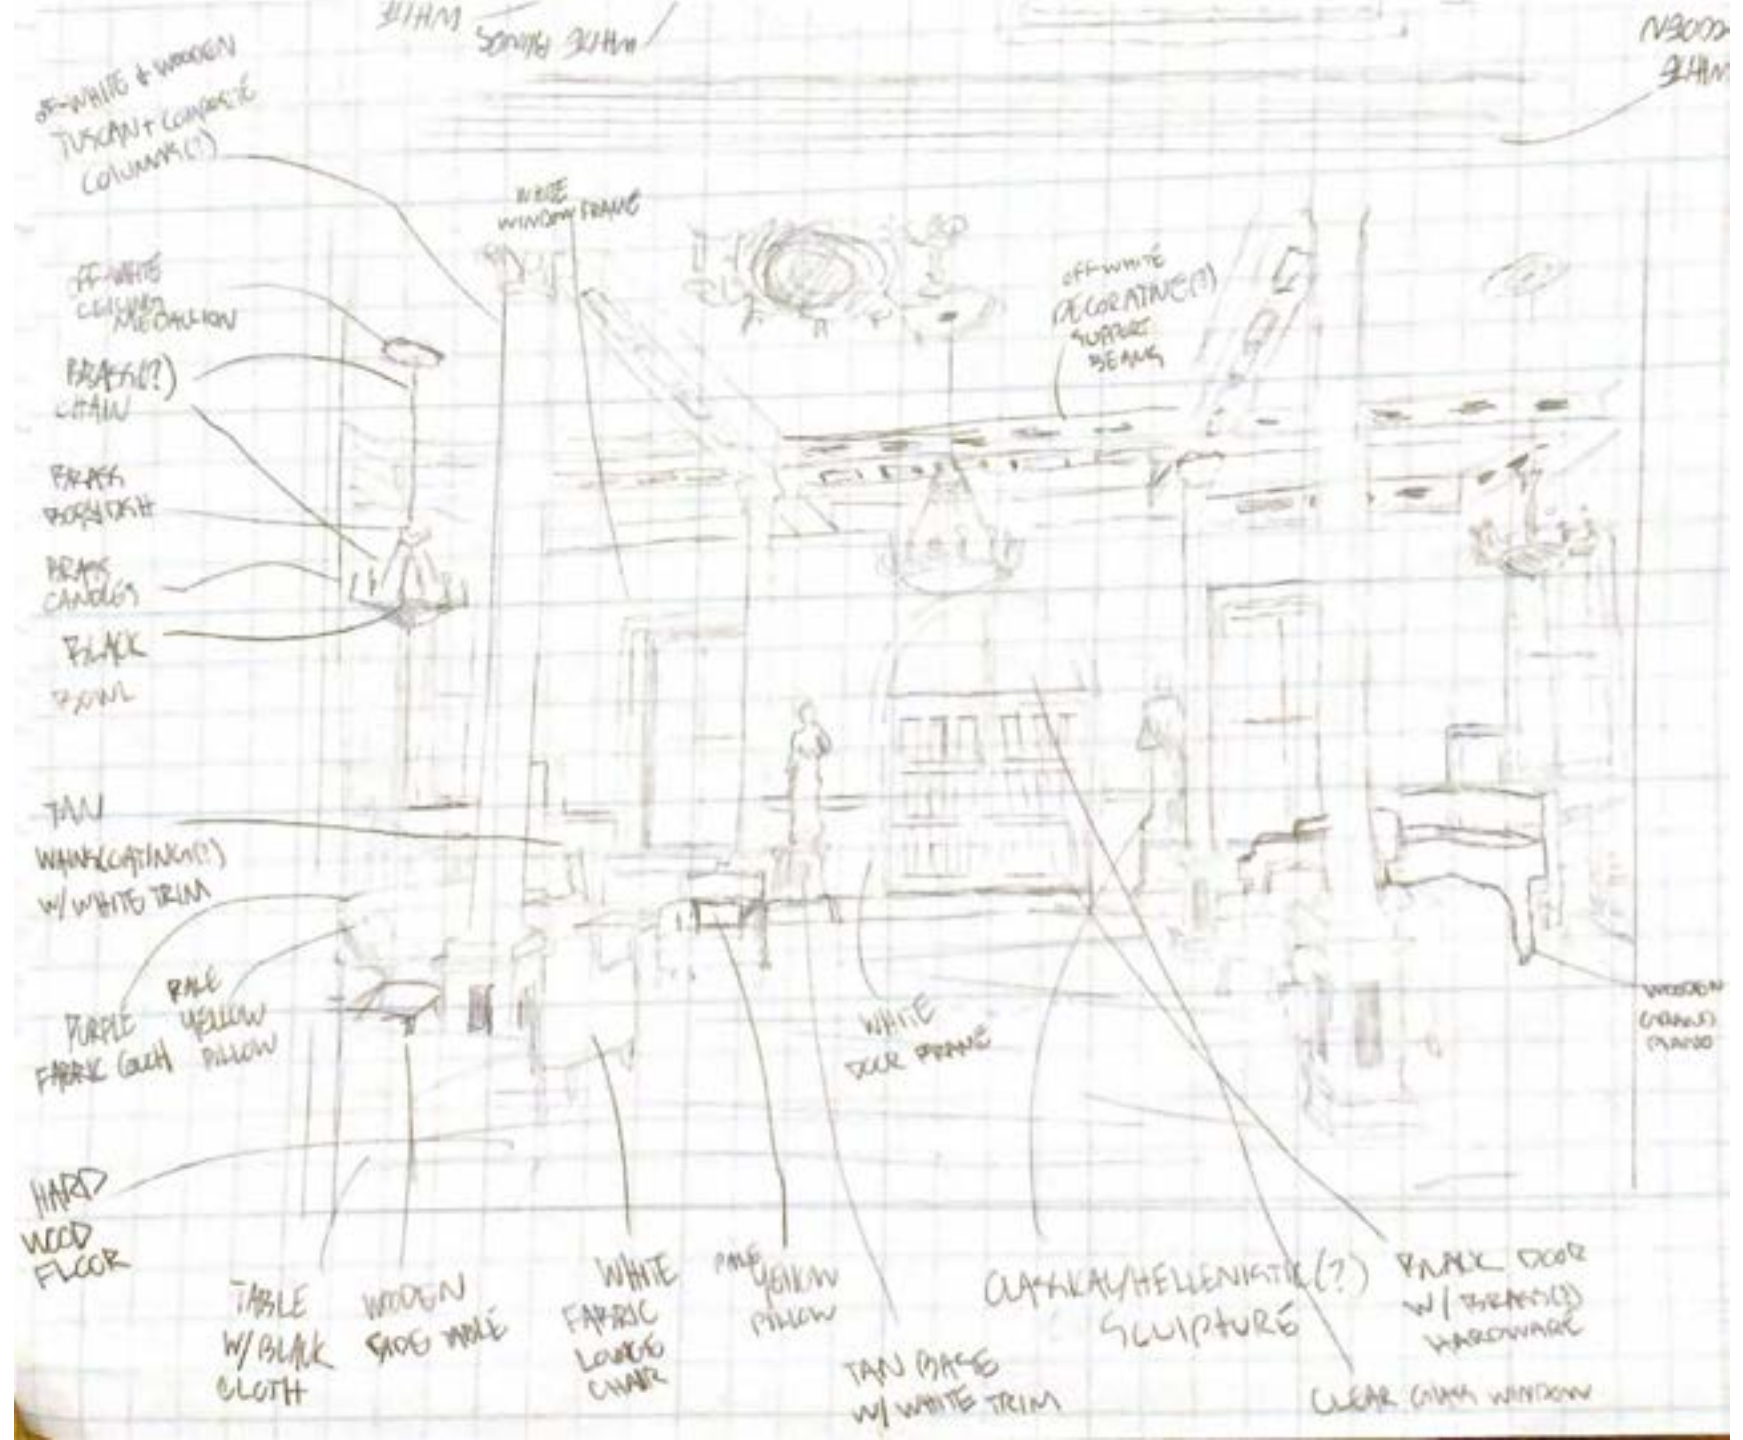

2. Indicate the application of what form/shape, scale, proportion, and balance- symmetrical or asymmetrical take place.

Geometric shape is used throughout, with the room and most furniture being rectangular/angular, scale and proportion are used to make sure certain objects (ex the bed and desk) can comfortably fit in the space. Symmetrical balance is noticeable on the lowest wall, where the chest of drawers is situated in the middle of the wall.

3. Descriptions of why you chose to draft this specific space and layout.

I chose to draft this space because I wanted to see how it could be utilized when different furniture is used.
